APPENDIX 1 – DETAILED PROGRAMME OF THE TRAIN-THE-TRAINER COURSE FOR RADIATION PROTECTION PROFESSIONALS

OBJECTIVES OF WP4 – REMINDER

The objective of work package 4 is to **develop a train-the-trainer strategy** that will, along with other aspects, **promote the ECVET concept**. In this way ENETRAP III aims for a **sustainable implementation of the most recent didactic methods** in a harmonized way throughout current and future training courses in radiation protection (and other nuclear topics), **facilitating good practices in training course development and implementation**.

A pilot session will be organized and evaluated.

INTRODUCTION

The Train-The-Trainers course is a new theme within ENETRAP III project. It has not been investigated in ENETRAP I nor ENETRAP II. This Work Package #4 aims to describe and propose a Train-The-Trainers course required for a target audience that could be Radiation Protection Experts (RPE) or Radiation Protection Officers (RPO) but also Radiation Protection Professionals.

But competences issued by this training and called "soft skills", will be relevant regardless of the scientific field. So at first, for the pilot session, trainees coming from the radiation protection domain will be targeted but competences acquired during the training will also be used for people working in other domains and/or ensuring the role of occasional trainer.

Particular emphasis is placed on ECVET (European Credit for Vocational Education and Training) approach that is driven by learning outcomes.

According to all learning outcomes that must be acquired, the duration of the training is one week.

This training will alternate theoretical plus methodological contributions and real-life professional situations. This training is intended for professionals already involved in training.

Although the area in which these individuals have a position is not important in the context of this type of TTT course. It is likely that for this first course, participants come from the radiation protection domain.

Indeed, alongside the technical competences also called "hard skills", human and relational qualities, "soft skills", are increasingly valued. These skills are oriented on the long term and help to predict the participant's ability to effectively integrate all knowledge, skill and attitude and then, they can teach in return. It should be noted that for projects of the European Commission within the nuclear domain, this type of training is very rare.

In this TTT course, there is the desire of training designers to offer a highly participatory training and thus trainees will be highly attracted and involved in the training process through tailored sequences.

THE ECVET APPROACH: SPECIFICITY OF THE ENETRAP III TRAIN-THE-TRAINER COURSE FOR RADIATION PROTECTION PROFESSIONALS

To develop the curriculum and design the TTT strategy, an inventory of existing TTT courses was carried out. The objective was not to carry out an exhaustive benchmark on the subject but to draw up a map of existing trainings in terms of objectives (learning outcomes), duration, programme, target audience, used methodologies and satisfaction of participants and then highlight the points of convergence and points of divergence and also highlight the specificities of the train-the-trainer course for radiation protection professionals developed.

This inventory concerns, on the one hand, generic train-the-trainer courses and, on the other hand, specified train-the-trainer courses (addressed to a specific target audience). Since the pilot train-the-trainer course for radiation protection professionals was asked to be conducted in French by the Steering Committee of June 2016 in Munich, the status report covers training courses available in French and English.

GENERIC TRAIN-THE-TRAINER COURSES

	Examples of training centres	Number of trainings proposed	Type of training and duration	Programme / themes addressed	Pedagogical methods	Participants testimonies (samples)
French TTT courses (translated from French)	DEMOS	18	 Appropriate the fundamentals of training delivery (11 trainings between 2 & 5 days + 1 certified training = 14 days) Develop one's trainer status (3 trainings : 2-3 days) Designing relevant training actions (4 trainings : 3 days + 1 certified training = 14 days) 	Sample programme The fundamentals of adults learning Prepare one's training Deliver a training involving participants and promoting learning Manage a group in training Evaluate the training efficiency	Role plays, group discussion and sharing, theoretical contribution, concrete case study	No reference
	MMC FORMATIONS	3	 Train-the-trainer course: 2 days Improvement to course delivery: 1 day Develop your business as an independent trainer: 1 day 	Master pedagogy Design a training action Chose and master visual course material in training The 4 high points of a training Master training Liven up a group	Not indicated	No reference
	Haute école coaching	1	• Consultant trainer (duration not indicated)	The key missions of the trainer Design a training action Design one's training material Design and deliver an e-training Mistakes to avoid Evaluate training	Not indicated	No reference
	CEGOS	21	 Design and deliver training courses: fundamentals (8 trainings between 1 & 3 days + 1 certified training = 11 days) Design and deliver training courses: improvement (2-3 days) Design and deliver training courses with digital tools (4 trainings between 1-3 days + 1 certified training = 9 days) 	Sample programme Appropriate specifications Design a lesson plan adapted to participants and targeted learning outcomes Design relevant pedagogical course material (trainer / learner) Deliver a training with ease Create a group dynamic	Training-action: case studies and workshop	4,7/5 Very rewarding training Accurate and concrete training

European Network on Education and Training

in Radiological Protection

	Examples of training centres	Number of trainings proposed	Type of training and duration	Programme / themes addressed	Pedagogical methods	Participants testimonies (samples)
		E		Evaluate learnings Adopt a participant-oriented trainer posture		
	AFPA	1	 Professional adults trainer (qualified training = 8 months) 	Design a training action Design and deliver learning situations Evaluate the training device Accompany learners in the development and implementation of their learning path	Alternation between face-to- face and on-the- job training	No reference
English TTT courses	ATD 11 • Introduction to Training Certificate (1 day) 5 • Training Certificate (3 days) • Training Certificate (3 days) • F • ATD Master Trainer TM Program (1 year) • Essential of Icebreakers and Energizers (4.5h) • Facilitating virtual Training Certificate (12h) • Consulting Skill certificate (2 days) • Facilitating virtual Training Certificate (12h) • Consulting Skill certificate (2 days) • Essential of coaching SMEs to facilitate learning (4.5h) • Motivating & Engaging learners (e-learning : 1 year) • Accelerated Learning certificate (2 days) • Rapid video development for learning certificate (2 days) • Rapid video development for learning certificate (2 days)		 Introduction to Training Certificate (1 day) Training Certificate (3 days) ATD Master Trainer[™] Program (1 year) Essential of Icebreakers and Energizers (4.5h) Facilitating virtual Training Certificate (12h) Consulting Skill certificate (2 days) Essential of coaching SMEs to facilitate learning (4.5h) Motivating & Engaging learners (e-learning : 1 year) Accelerated Learning certificate (2 days) Rapid video development for learning certificate (2 days) Essentials of training for global audiences (4.5h) 	Sample programme Purpose & assessment : needs, date analysis, learning objectives Planning & preparation : adult learning principles, preparing the material, environment & yourself, the 4 dimensions of learning Presentation & facilitation: establishing a positive learning environment Performance: level of evaluation, self-assessment	Not indicated	Very interactive training, my skills as a trainer grew dramatically in a short period
	British council of India	1	• Train the trainer : 5 or 10 days	Methodology Language analysis Lesson planning Micro teaching sessions English language & communication skills trainers	Lectures performances	No reference

European Network on Education and Training

in Radiological Protection

Examples of training centres	Number of trainings proposed	Type of training and duration	Programme / themes addressed	Pedagogical methods	Participants testimonies (samples)
IMPACT FACTORY	1	• Train the trainer course : 2 days	Using one's personal style : self-assessment, dealing with difficult participants/situations, knowing your own behaviour Designing a training	Exercises, no other information	The course was brilliant and found it very practical and relaxed, it brushed away the cobwebs of dull training structures from the past and introduced laughter, energy and enthusiasm
AMA	1	• Training the trainer : 3 days	Active adult learning Assessment Objectives, planning active training Facilitating presentations & activities : opening exercises, brain friendly-lectures, lectures alternatives, experimental activities Extending the value of training Evaluating training Closing activities	Workshop, performance, discussion, role- play, games and simulation,	Very high level of satisfaction This training has truly changed the way that I view how to train, It was incredibly eye opening, Great training environment, I have many opportunities to take this back to work.
Total Success	2	• Training The Trainer : 1 and 2 day courses	2 day courses Fundamentals for becoming a trainer Running a training course Delivering a training session successfully How to write and structure training Factors for effective training skills What makes a good trainer? Effective training practice and procedure Body language and voice projection skills Classroom training versus one-to-one training		No reference

Tab 1: Comparison of French and English generic train-the-trainer courses

Points of difference

Table 1 above, highlights two points of divergence

- The number of French TTT courses seems much larger and varied than those in English. This may be due to the fact that internet searches were conducted from a French browser or from ignorance of UK or US training centres.
- The types of French TTT courses seems more diverse than the English versions.

Points of convergence

Regarding the other comparative points of Table 1, namely the program and the topics covered and the pedagogical methods, the generic French and English TTT courses are very similar.

- Program and themes covered: training design and animation (at different levels depending on the programme)
- Various pedagogical methods fostering interactivity
- Participants' satisfaction: high level of satisfaction

The below table presents an inventory of specialised TTT courses, for different specific domains such as:

- Aeronautics
- Aviation
- Automotive
- Nuclear

SPECIALIZED TRAIN-THE-TRAINER COURSES

Domains	Training centres in the domain	Number of trainings proposed	Type of training and duration	Programme / themes addressed	Pedagogical methods	Participants testimonies
ronautics	NAWC	1	 Train the trainer guide – A guide to introduce (non-career) instructors on teaching techniques 	Psychology of learning Prepare the lesson plan Instructional methods How to conduct classroom presentations The use of transitions Advantages of questions Quick list of hints for good instruction	Not concerned	No reference
Ae	APAVE (FR)	1	• Aeronautics Train the trainer course (5 days)	Technics and pedagogical methods in order to share one's knowledge and know-how Communicate and manage the group dynamic	Interactive lecture Case studies	No reference
	ΙΑΤΑ	1	 Aviation security train the trainer (classroom, 5 days) Enhance your skills as a trainer with the latest teaching methods in aviation security (5 days) 	Developing a course : needs, objectives, lesson plans Deliver a course Teaching aviation security Closing a course	Practical exercises Performances Oral presentation	I would recommend this course
Aviation	Plane Training	9	 Basic and advanced instructional techniques (3-5 days) Aviation Medecine (2-3 days) Aircraft type specific – airbus CRM trainer (4-5 days) CRM refresher (1day) Aviation security (4 days) Wet drill and survival (1day) Fire and smoke (2 days) 	Teaching and learning process Training preparation Training delivery and feedback Group dynamic, practice session, report writing How to design and deliver technical knowledge Technical knowledge depending on the training course	Practical exercises Performances + video Group discussion	No reference
	SQUADRA CONSULTANTS (FR)	1	 Formation for instructors "teaching & learning" (5 days) 	The pedagogical situation The relationship process The teaching process	Lectures Discussions Performances	No reference

European Network on Education and Training

in Radiological Protection

Domains	Training centres in the domain	Number of trainings proposed	Type of training and duration	Programme / themes addressed	Pedagogical methods	Participants testimonies
				The learning process The human factors applied to instruction		
	SMRT	1	• Train the trainer certification (60 days)	Training skills, curriculum design and assessment development Develop Performance and Learning Strategies Develop and deliver Competency-based Training Develop and deliver Competency-based Assessment	Not indicated	No reference
Automotive	JOE VERDE SALES & MANAGEMENT TRAINING	1	• Train your trainer (2 days)	Create a continuous 30-60 day training plan to develop the specific skills you know you need Prepare for daily training in 10 minutes or less Get every salesperson involved in every meeting, every time, without exception Get everyone involved in practicing each topic so they can develop the skills they need to improve Get verifiable results from every meeting you hold	Very interactive course	Practically every attendee tells us this is the most intense, most exciting and most exhausting course they've ever attended
Nuclear	IAEA (FR/EN)	1	• Train the trainers course (5 days)	Learning factors (motivation, perception, memorization, understanding); Communication phenomena (active listening, teaching styles); Training rules and techniques; Designing a training programme; Tools and teaching aids. Familiarize participants with the training material developed by the IAEA	Interactive : discussions and course delivery on technical topics	No reference

Tab 2: Comparison of specialized train-the-trainer courses

Points of difference

Table 2 above does not highlight fundamental differences.

Some areas, in particular aviation and aeronautics, offer a sizeable offer of train-the-trainer courses and for different audiences. It seems that these sectors are committed to the quality of trainings and that « training [shall be] conducted by 'suitable qualified persons'¹».

Points of convergence

Similarities are identified in Table 2 on items such as: the program and themes, duration (except certified training) and pedagogical methods, the different trainings – regardless of specialty:

- Program topics: training design and animation (at different levels depending on the program) with specific sequence linked to the area of expertise (tools, regulations, technical knowledge ...)
- Duration: between 1 and 5 days
- Varied pedagogical methods fostering interactivity

ADVANTAGES AND INTEREST FOR THE TRAIN-THE-TRAINER COURSE FOR RADIATION PROTECTION PROFESSIONALS

When analysing the two tables and their data, the main difference between a generic TTT course and a specialized TTT course appears to be the programme and themes.

While the two types of trainings (generic & specialised) clearly cover aspects of training design and animation, specialized TTT courses incorporate one or more specific sequences related to the area of expertise in their program, for example with regard to pedagogical tools, regulations or technical knowledge.

On the other hand, none of the training courses presented above, whether generic or specialised courses, in French or in English, include in their program the ECVET approach. This particular point makes the train-the-trainer course for radiation protection professionals unique.

Indeed, in a context where professional mobility is at the heart of discussions on vocational training, it seems necessary to promote the development and implementation of training programs under the ECVET approach in order to facilitate and anticipate potential partnerships between European companies and thus recognize the corresponding skills acquired.

LEARNING OUTCOMES UNIT NO. 2: IMPLEMENTATION OF THE ECVET APPROACH			
Skills	Knowledge		
S.2.1 Develop a learning outcome unit according to the ECVET approach	 K.2.1 Identify the different European tools to promote professional mobility: principles, benefits point of attention K.2.2 Present the principle and the major steps of the ECVET approach K.2.3 Present the learning outcomes approach K.2.4 Identify criteria for learning outcomes K.2.5 Present the descriptors of learning outcome: knowledge, skill, attitude K.2.6 Identify the different components of a curriculum according to the ECVET approach 		
Ass	ESSMENT CRITERIA		
ECVET approach SKILL • Designing a learning outcome unit according to the ECVET approach: title qualification, EQF level, list of learning outcome units, description learning outcome units according to KSC, evaluation criteria, evaluation modalities • Units, description learning outcome units according to KSC, evaluation criteria, evaluation modalities • List of the 5 criteria for a relevant learning outcome: 1) public target (= WHO), 2) element of the learning path after which learning outcomes aime to be achieved (= WHEN), 3) the action that must be made and the conten to which it refers (= WHAT), 4) situations, circumstances, the conditions in which this action must be made (= HOW), 5) expected performance level (= HOW ++) • List of constituent elements of a curriculum according to the ECVET approach: title qualification, EQF level, list of learning outcome units, description learning outcome units, according to KSC, evaluation criteria, avaluation modalities			
RECOMMENDED ASSESSMENT METHODS			
Group practical work: design a learning outcomes units according to the ECVET approach			

LEARNING OUTCOMES UNIT NO. 3: DELIVERY OF A TRAINING SESSION				
AUTONOMY/RESPONSIBILITY				
Addressing a serenely training session: a successful training, do breathing exercises, making speech exercises Implement trainer's roles: content provider, facilitator, moderator Adopt a caring attitude towards participants Manage a group of learners / different learner profiles Manage and bounce off the remarks of learners				
Sκι	LLS		KNOWLEDGE	
 S.3.1 Create a favourable climate for learning at the beginning of the training session S.3.2 Facilitate interactive training, promoting exchanges and learners participation 		K.3.1 Ex K.3.2 Di K.3.3 Ex K.3.4 Id K.3.5 Id K.3.6 Ex K.3.7 Id K.3.8 Pr	xplain the concept of the pedagogical triangle istinguish the concepts of andragogy and pedagogy xplain the different roles of adults trainer lentify the body posture essential to the trainer lentify the fundamentals of adult learning xplain the training good practices lentify potential difficulties in group life and possible resolution means resent techniques to arouse the attention and participation of learners	
	Assess	MENT CRIT	FERIA	
 AUTONOMY / RESPONSIBILITY Calm attitude, anchor Taking into account the attitude of the group Benevolence towards the group / participants: no judgment, constructive feedback, encouragement, active listening, empathy 	 SKILL Implementation of 5-time start of training: welcome, meet, presen progress of the training, participe objective, present the group operules and practical aspects Animation with proposal of different teaching methods, involving participants, experience sharing 	of t the ants rational rent	 KNOWLEDGE Explaining the concept of the pedagogical triangle: the role of stakeholders (trainers, learning and knowledge) as well as existing process between each stakeholder (process knowledge-trainer / trainer-learner / learner-knowledge) Definition of andragogy and pedagogy concepts Presentation of the different roles of adult trainer: content provider, facilitator, moderator List of postural elements essential to the trainer: voice, look, attitude, use of space, body language, words Presentation of the fundamentals of adult learning: 	

RECOMMENDED ASSESSMENT METHODS

Individual performance/scenario:

- give a short training in front of (real) audience (1 or 2)
- self-assessment after the training session: trainer's practices according to criteria

Written quiz on the subject with various type of questions: multiple-choice, open questions, connect the related definition, order logically, open questions...

LEARNING OUTCOMES UNIT NO. 4: EVALUATION AND IMPROVEMENT OF A TRAINING SESSION				
Self-assess and analyse one's practices as a trainer according to an evaluation grid Take a step back compared to the results of evaluations and self-evaluation				
Skills			Knowledge	
 S.4.1 Design the evaluation of training taking into account the learning outcomes of the training S.4.2 Analyse the results of evaluations by level and propose improvements to the training device S.4.3 Highlight strengths to capitalize and propose possible improvements after these analyses 		 K.4.1 Present the Kirkpatrick's and Philips's evaluation model K.4.2 Identify the different levels of evaluation K.4.3 Compare types of evaluation: formative, summative K.4.4 Identify evaluation methods of a training 		
	Assess	SMENT CRITERIA		
 AUTONOMY / RESPONSIBILITY Objective analysis of results and highlighting strengths and improvements 	 SKILL Science Science		 KNOWLEDGE Explanation of the different levels of the Kirkpatrick's and Philips's evaluation model: what is evaluated, by whom, when, why, how Explaining the difference between summative and formative assessment Examples of evaluation mode: quizzes, situation scenario, case study 	
RECOMMENDED ASSESSMENT METHODS				
Individual or group practical work: design the evaluation of a training session Written quiz on the subject with various type of questions: multiple-choice, open questions, connect the related definition, order logically, open questions				

COURSE MATERIAL

This chapter presents the different pedagogical sequences developed to reach the specified learning outcomes. Appendix 1 presents the detailed programme of the Train-the-trainer Course for Radiation Protection Professionals.

PROGRAMME OF THE TRAIN-THE-TRAINER COURSE FOR RADIATION PROTECTION PROFESSIONALS

This programme is the result of the evaluation of the French pilot session, held in February 2017. In fact, at the end of this pilot session an evaluation and report was made to bring potential improvements to the programme.

APPENDICES

APPENDIX 1 – DETAILED PROGRAMME OF THE TRAIN-THE-TRAINER COURSE FOR RADIATION PROTECTION PROFESSIONALS

DAY 1 - MONDAY			
8:45 to 9:00	Welcome		
9:00 to 9:15	S1. Introduction to the training course		
	Presentation of the objectives and the training program Self-assessment of one's learning (before/after)	aining 2/after)	
9:15 to 10:30	S2. Round table and sharing experience Crossed presentations	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)	
10:30 to 10:45	Break		
10:45 to 11:20	S2. Round table and sharing experience Sharing and feedback experience	-	
11:15 a.m. to 12:00 p.m.	S3. Training Self-assessment: what type of trainer are you? Explanation for homework Short training preparing		
12:00 to 1:30 p.m.	Lunch break		
1:30 p.m. to 2:45 p.m.	S3. Training Short training delivery + debriefing (2 groups)	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)	
2:45 p.m. to 3:00 p.m.	Break		
3:00 p.m. to 4:15 p.m.	S4. Pedagogical visit Practical field school + debriefing	AM GOURONNEC (INSTN)	
4:15 p.m. to 4:30 p.m.	Conclusion and key points of the day	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)	

DAY 2 - TUESDAY				
8:45 to 9:00	Welcome			
9:00 to 9:10	00 to 9:10 - Questions / answers - Program and objectives of the day			
9:10 to 10:20	S5. Training design methodology Group work and contributions: How to design a training course	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)		
10:20 to 10:30	Break			
10:30 to 11:15	S5. Training design methodology Practical work			
11:15 to 12:00	S6. The fundamentals of adults learning Self-assessment: what type of trainer are you? Debriefing Learning process			
12:00 to 1:20 p.m.	Lunch break			
1:20 p.m. to 2:45 p.m.	S6. The fundamentals of adult learning Learning factors and good practices	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)		
2:45 p.m. to 3:00 p.m.	Break			
3:00 p.m. to 4:15 p.m.	S7. Pedagogical visit Works and demonstration: detection of ionizing radiation	JC BODINEAU (INSTN)		
4:15 p.m. to 4:30 p.m.	Learning evaluation Conclusion and key points of the day	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)		

DAY 3 - WEDNESDAY			
8:45 to 9:00	Welcome		
9:00 to 9:10	Introduction of the training day Questions / answers Program and objectives of the day 		
9:10 to 10:30	S8. Training materials Digital tools to create training resources Practical work	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)	
10:30 to 10:45	Break		
10:45 a.m. to 12:00 p.m.	S8. Training materials How to design relevant training materials Different teaching methods		
12:00 to 1:20 p.m.	Lunch break		
1:20 p.m. to 2:45 p.m.	S9. Speaking Improvisational theatre exercises	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)	
2:45 p.m. to 3:00 p.m.	Break		
3:00 p.m. to 4:20 p.m.	S10. Pedagogical visit Calculation software for dose calculation: how to design exercises?	A. VIVIER (INSTN)	
4:20 p.m. to 4:30 p.m.	Learning evaluation Conclusion and key points of the day	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)	

DAY 4 - THURSDAY			
8:45 to 9:00	Welcome	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)	
9:00 to 9:10	 Introduction of the training day Questions / answers possible Program and objectives of the day 		
9:10 to 10:45	S12. ECVET approach Context and principles Practical work	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)	
10:45 to 11:00	Break		
11:00 a.m. to 12:00 p.m.	S13. Training good practices Group management	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)	
12:00 to 1:30 p.m.	Lunch break		
1:30 p.m. to 3:00 p.m.	S14. Prepare a training session Practical work (Part 1)		
3:00 p.m. to 3:15 p.m.	Break	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)	
3:15 p.m. to 4:15 p.m.	S14. Prepare a training session Practical work (Part 2)		
4:15 p.m. to 4:30 p.m.	Learning evaluation Conclusion and key points of the day		

DAY 5 - FRIDAY			
8:45 to 9:00	Welcome and introduction of the training day - Questions / answers - Program and objectives of the day	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN)	
9:00 to 10:30	S15. Deliver a training session to a specialized audience Video recording Evaluation grid of the given sequence (Part 1)	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN) + Students EMRP Master	
10:30 to 10:45	Break		
10:45 to 11:45	S15. Deliver a training session to a specialized audience Video recording Evaluation grid of the given sequence (Part 2)	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN) + Students EMRP Master	
11:45 to 12:00	S15. Deliver a training session to a specialized audience Self-assessment of one's training sequence	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN	
12:00 to 1:30 p.m.	Lunch break		
1:30 p.m. to 2:45 p.m.	S15. Deliver a training session to a specialized audience Analysis and debriefing of the training sessions: what improvement?		
2:45 p.m. to 3:00 p.m.	Break	P. LIVOLSI (INSTN) F. MARCUCCINI (INSTN	
3:00 p.m. to 3:45 p.m.	 S16. Evaluation and conclusion of ENETRAP III training session Self-assessment of one's learning (before and after) Conclusion of the training session
