

Early bird registration deadline ends June 10, 2026

Programme is now available, including speakers from European Commission, IAEA, IRPA, HERCA and more.

This event will bring together experts, educators, regulators, and stakeholders to explore competence-based approaches in radiation protection education and training.

Topics of the workshop

- Designing competences in radiation protection, including soft skills, AI literacy, and sustainability
- Evaluation of competences: methods, tools, and best practices
- Qualification pathways for Radiation Protection Experts (RPE) and Radiation Protection Officers (RPO), including validation, accreditation, certification, and micro-credentials
- European competence frameworks: comparisons, references, and country-specific developments

Take part in the dialogue to shape the future of radiation protection training across Europe.
